

## NAME

psprint – print various types of files to a PostScript printer

## SYNOPSIS

**psprint** *file* ...

## DESCRIPTION

The **psprint** script invokes various helper programs, including **groff**, **gs**, **enscript**, **gzcat**, **zcat**, and **lpr** to format various types of files and print them to a PostScript printer.

## FILETYPES

The following types of files are supported:

**\*.c \*.h \*.cpp \*.hpp \*.C \*.H \*.cc \*.cxx \*.hxx \*.c++ \*.h++ \*.m \*.i \*.ii \*.s \*.S**  
C, C++, Objective-C, and Assembler source files.

**\*.pdf**  
PDF documents.

**\*.pdf.gz**  
Gzipped PDF documents.

**\*.pdf.Z**  
Compressed PDF documents.

**\*.ps \*.eps**  
PostScript files.

**\*.ps.gz \*.eps.gz**  
Gzipped PostScript files.

**\*.ps.Z \*.eps.Z**  
Compressed PostScript files.

**\*.java**  
Java source files.

**\*.[1-9]\* \*.man**  
Manpages.

**\*.pl \*.py \*.sh \*.csh \*.shrc**  
Perl, Python, and shell scripts.

**\*.txt \*.log \*.html \*.xml**  
Text files, log files, HTML and XML documents.

**GNUmakefile [Mm]akefile \*.mak \*.mk [Cc]onfigure \*.m4 \*.in**  
Makefiles, Configure scripts, and autoconf/automake files.

All other documents which appear to be ASCII text files are also supported.

**SEE ALSO**

**groff(1), gs(1), enscript(1), gzcat(1), zcat(1), lpr(1)**
